

VERIFIN

MALFORMED TRANSACTION LOG -- ERROR TEST

SYNTHETIC TEST DATA -- NOT REAL FINANCIAL INFORMATION

This file is additionally, and intentionally, INVALID -- see below.

This document intentionally contains malformed transaction information and should be used to test validation and error handling rather than successful AML analysis.

Transaction ID	Date	Amount	Currency	Type
BAD-001	NOT-A-DATE	ONE THOUSAND	???	UNKNOWN
BAD-002	(blank)	-999999999999	(blank)	(blank)
BAD-003	2026-99-99	ABC	USD	TRANSFER
BAD-004	INVALID	(blank)	INVALID	INVALID

TEST EXPECTATION: Verifin should detect invalid or unusable transaction data and provide a clear validation/error state rather than producing a confident AML conclusion.

SYNTHETIC TEST DATA
